TASKI swingo 150

The new class of ultra compact scrubber driers

Easy cleaning of congested areas

The upright design is similar to conventional upright vacuums. The machine can be used where conventional scrubber driers are simply too heavy, and manual cleaning methods do not deliver required hygienic results. The innovative concept enables the operator to move the machine easily in every direction.

Simple, fast and ergonomic operation

The machine is handy and easy to manoeuvre. Comfortable handles make it easy to lift, and transport the Swingo 150 on stairs. With very compact dimensions it is easy to store.

Immediately dry floors

Busy areas like shops, sanitary facilities, restaurants, petrol station shops, foyers etc. cleaned with the TASKI Swingo 150 can be used immediately and safely with a reduced risk of slip-fall accidents. The machine is drying forward and backwards. The unique suction unit removes up to 99% of water from the floor, whereas manual cleaning methods always leave used cleaning solution that leads to soiling by people walking on still wet floors

Excellent cleaning results

High mechanical scrubbing action and a pressure up to 10 times higher compared to manual cleaning ensure best cleaning results. A single scrub and dry process guarantees less soil residues. With the unique low brush head, the TASKI Swingo 150 allows quick and smooth access under shelves, racks, furniture and other objects.

Technical Data

Working width	335 mm
Squeegee width	355 mm
Solution tank	2.6 l
Recovery tank	2.9 l
Nominal consumption	1100 W
Rated voltage	230 V / 50 Hz
Brush rotation speed	1700 RPM
Machine weight empty w/out cord	11.7 kg
Handle weight	1.3 kg
Dimensions (L x W x H)	430x380x1120 mm
Cord length	10 m
Sound pressure level	74 db(A)
Protection class	II
Approvals	CE/CB Test cert./ IMQ/cETLus
