

New Ariel Professional System

Introducing the New Ariel Professional Dosing System

CJS
Portsmouth Ltd

For more information please contact your Sales Executive or contact our sales team on 02392 434505.

Improved cleaning through better removal and prevention of stains.

What's different about the new dosing range?

As a company globally we are moving from an alkaline laundry system to a pH neutral system which is designed to deliver to lodgings an unprecedented impression on their guests and help care homes to make their residents feel more comfortable whilst helping to maintain their bottom line by;

- Reducing linen replacement costs
- Saving staff time spent on rewashes
- Reducing energy by offering a 40°C wash system
- Reducing machine maintenance

New Products

Ariel Liquid Detergent Enhanced Actilift

Enhanced Actilift technologies provide increased stain removal that is gentle for colours and helps prevent stains from setting in.

- Disinfection – kills MRSA at 60°C.
- No need to use surfactant booster.
- Use only with the Professional Ariel Automatic System

Lenor Fabric Softener

Uses a technology that protects the freshness during tumble-drying so linen still smells fresh when it reaches the room. The helps create a more pleasant environment for staff and residents.

- Long lasting freshness – unique perfume technology makes your laundry smell fresh and remain fresh for longer.
- Superior softness – gives your laundry superior softness and reduces mechanical friction.
- Four times concentration
